

# Sustainability Policy

As the largest public institution of higher education in Malaysia with 34 campuses, over 17,000 staff and 180,000 students, UiTM has adopted this policy as a means of supporting the United Nations Sustainable Development Goals (SDG) agenda. To address the university's primary function, the following fundamental principle policies have been drawn:

## Student Affairs:

Focus on the good health and wellbeing of the students to ensure that their leadership development, value, superior soft skills and personalities are cultivated to fulfil global demands in the best possible way.

## Industry, Community and Alumni Network:

Empower the university's community in establishing strategic networking and partnership with industry, community, alumni, governmental bodies and relevant institutions towards achieving the SDG goals.

## Governance:

Implement sustainability strategies across the system, manage goal setting and reporting processes, strengthening relationships with external stakeholders and ensuring total accountability at all cost.

## Legal:

Provide the highest quality legal services to all its clients with efficiency, integrity and professionalism to uphold peace and ensure a sustainable, strong and just institution.

## Academic & International Affairs:

Professionally manage and deliver high quality Education for Sustainable Development (ESD) that equips students with the knowledge, skills, values, and attitudes to address all interconnected global challenges including climate change, environmental degradation, biodiversity, poverty and inequality.

## Research and Innovation:

Propel talents to embark on transdisciplinary and translational research through execution of relevant research projects, publication of significant discoveries, development of novel solutions and commercialization of research products that are directly related to Sustainable Development Goals (SDGs).

## Development:

Maintain and improve service quality, optimize resources and synergize effort of all stakeholders towards achieving world class sustainable best practices consistent with UiTM's vision of providing a leading conducive ecosystem for academic advancement.

## Finance:

Implement a financial management system in a professional, efficient, effective, sustainable and responsible manner in planning and program implementation consistent with university strategic planning.

This policy, approved by  
Board of Director  
Universiti Teknologi MARA  
covers all University activity.
